

CellCor T™ Scientific data

A

B

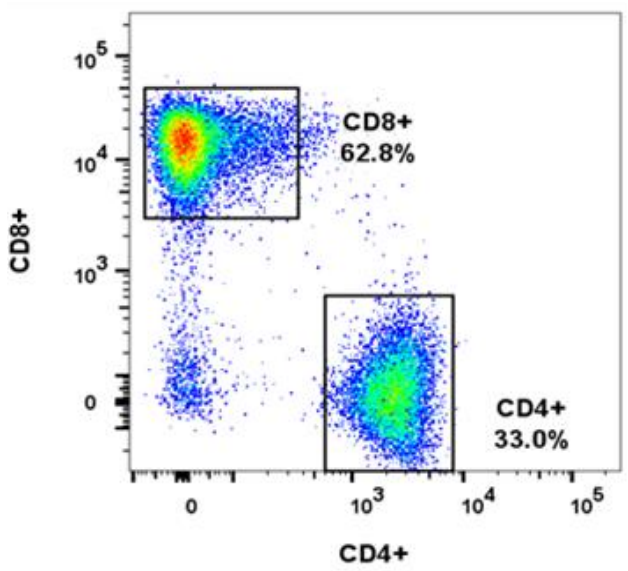

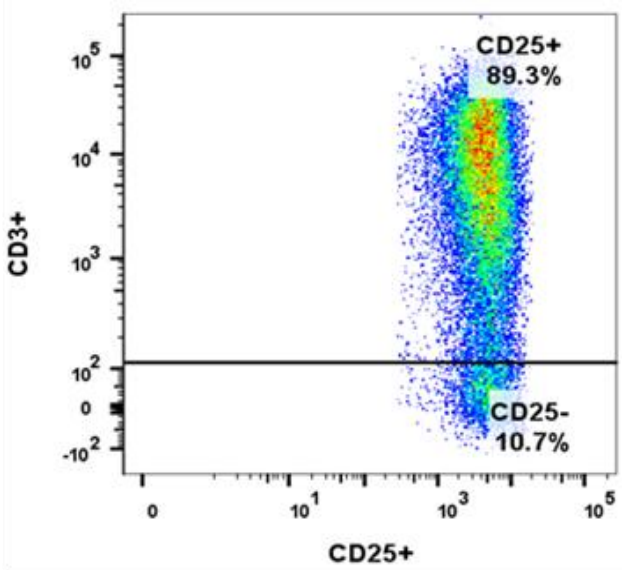

Title

Superior growth efficiency and viability of CellCor™ T compared to other comparative media

Results

- Pan T cells were cultured for 9 days using CellCor™ T, Commercial A and Commercial B media.
- CellCor™ T demonstrated enhanced T cell proliferation and consistently high viability over 9 days, showing comparable or better performance than Commercial A and B.

(%)

	CD4+	CD8+	CD25+
CellCor T ™	33.0	62.8	89.3
Commercial A	60.8	32.1	90.7
Commercial B	66.7	29.0	78.0

Title

Surface marker expression of CellCor™ T comparative media

Results

- Pan T cells were cultured for 9 days in CellCor™ T and Commercial A and B media, and the expression levels of $CD8^+$ and $CD25^+$ were evaluated via flow cytometry.
- CellCor™ T supported a higher proportion of $CD8^+$ cytotoxic T cells and activated $CD25^+$ T cells relative to Commercial A and B, indicating improved functional T-cell expansion potential.
